

# PowerCore® TEC-10

## Turnkey Electronic Controller

A superior turnkey electronic controller, the PowerCore® TEC-10 panel provides full control of your engine including auto start/stop, auto throttling and display of engine parameters along with critical faults from the engine/application. The TEC-10 supports SAE J1939 CAN protocols for electronically governed engines as well as analog sensors on mechanical engines for fault and safety warnings/shutdowns.

The TEC-10 follows a standard operating sequence of 22 machine states that happen in a predetermined order. These machine states may be set to zero if not needed or adjusted to fit the application. The incredibly versatile menu structure allows parameters and settings to be changed from the face without the need of a PC tool, if desired. This flexibility allows for the same controller panel to be used across many applications and provides the operator familiarity with the controller panel in a variety of uses.

The controller panel features molded connectors that utilize industry-standard Deutsch connectors and are compatible for use on the simplest mechanical engine to the most advanced, fully electronic Tier 4 engines.\*

## Specifications

### TEC-10 Panel

Operating Voltage: 8-32 VDC, reverse battery polarity and load dump protected

Operating Temperature: -40° to +85° C (-40° to 185° F)

Storage Temperature: -40° to +85° C (-40° to 185° F)

**Cranking Power Holdup:** 0 VDC up to 50 mS (also good for brownout/blackout instances)

**IP Rating:** IP67

### Total Current Consumption:

Power on in stopped state; 117 mA at 12 VDC. Power on in standby mode; 52 mA at 12 VDC.

### Mating Connectors:

21 Position, Deutsch HDP26-24-21SE

31 Position, Deutsch HDP26-24-31SE

### Communications:

(1) CAN: J1939

(1) RS485: Modbus RTU

Products covered in this document comply with European Council electromagnetic compatibility directive 2014/30/EU and electrical safety directive 2014/35/EU.

Designed as a plug-and-play solution, the TEC-10 can also utilize a free PC configuration tool that allows customers to change default settings as well as provide three levels of passcode protection, if needed.

The rugged TEC-10 panel can be mounted directly to the engine or engine/application cover. Built to endure industrial environments from full sun to wide temperature ranges, the panel features a high degree of sealing for dust and water as well as the ability to withstand higher vibration with exposure.

\*Murphy Industrial Harness or John Deere OEM engine harnessing required.

### Inputs (9):

(5) Digital, configurable (active on High, Low, Open)

(3) Analog, configurable (4-20 mA, 0-5V, resistive or digital ground)

(1) Frequency, supporting:

Magnetic pickup (30 Hz - 10 kHz, 2.0 VAC-120 VAC) and Engine Alternator (30 Hz - 10 kHz, 4.5 VRMS - 90 VRMS)

### Outputs (8):

(3) Relays:

(2) +DC (10A)

(1) Form C (10A)

(2) Low-side FET: -DC (1A)

(2) High-side FET: +DC (1A)

(1) Dedicated Alternator Excitation +DC (1A)

**Languages:** English, Spanish, German, French, Italian

**Dimensions:** 9.59 x 7.34 x 5.20 in.

(243.48 x 186.5 x 132.23 mm) (WxHxD)

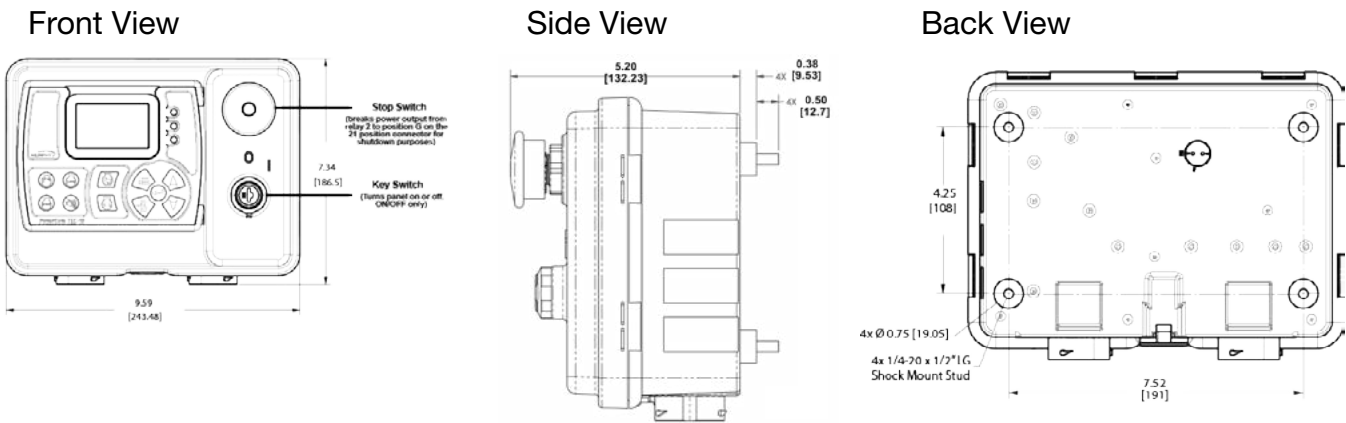

**Enclosure:** Polycarbonate

## How to Order

Part Number	Model and Description	Notes
40700495	PowerCore TEC-10 Panel	
40000602	Engine Harness, 21 Position Connector 10' Whip Harness (3m approx.)	
40000603	I/O Harness, 31 Position Connector 10' Whip Harness (3m approx.)	
40000479	Deutsch Connector Kit, 21-pin & 31-pin, Panel Connector Kit	
40000531	Deutsch Connector kit, 21-pin, Panel Connector Kit, Engine Only	
78700046	Deutsch Connector kit, 31-pin, Panel Connector Kit, I/O Only
